MONOZUKURI

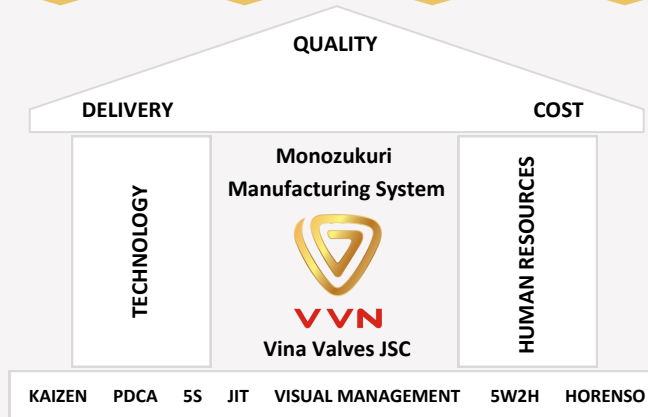

Vina Valves factory has implemented a Japanese-style Monozukuri production management system with the foundation of **QCDSE - Quality, Cost, Delivery, Safety, and Environment**, and Lean management with 5S, Kaizen, PDCA, Kanban, Visual management, Horenso, and 5W2H pillars. The **Japanese experts** who are leaders from Panasonic Corporation continue to train and improve Vina Valves Jsc's management system.

INNOVATION

Not factories from China, Taiwan, Vina Valves from Vietnam is the first OEM/ODM manufacturer in the world that has successfully produced field adjustable pressure reducing straight line valve with hot forging technology and get UL/FM approval.

Factory Area: 6000m2	Factory Machines: 200++	Factory Certified: UL/FM/ISO	Number of Employees 120++	Company Capital 4M USD	Turn over 2022 12.2M USD

FIRE PROTECTION VAVLES

The WORLD'S FIRST IE2600A-S-25 series that are made by the hot forging technology

TECHNOLOGY

Vina Valves Jsc is a manufacturer of **OEM/ODM Fire Protection Products**, which include Fire Hose valves, Hydrant Gate valves, Field Adjustable Pressure Reducing valves, Factory Set Pressure Reducing Valves, Pressure Restricting Valves, and accessories such as Adapters, Caps & Plugs, and FD Siamese Connections.

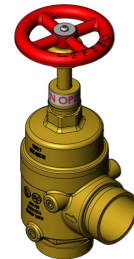

All of our products are manufactured by Vina Valves Jsc, comply with current safety standards and regulations, and have **UL/FM approval**. Our products have been exported to **customers in Canada and America**.

ODM • OEM

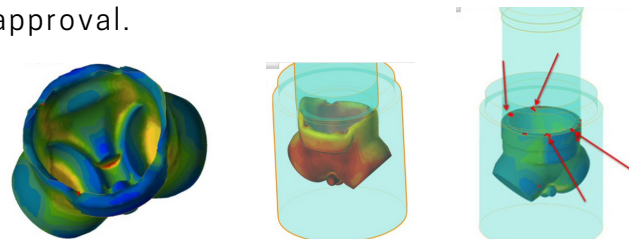

FIRE PROTECTION ADAPTER

Re-design, Casting to Forging, using stimulation software to customize products

RESEARCH & DEVELOPMENT

Not only are we an **OEM manufacturer** who produces products according to the technical drawings provided by the customer, but we also have the ability to **redesign** products to meet the specific requirements of our customers. Our R&D center utilizes *simulation software* for design, prototyping, and testing in our factory. Once samples are produced, they are sent to **UL/FM in the US** for testing and approval.

ODM • OEM

OEM FITTINGS

We export OEM Fittings to Japan, Korea, Thailand, USA, Europe

INNOVATION

We understand that innovation is a must-have for businesses in the era of Industry 4.0. With the Kaizen platform built with the support of Panasonic Japan, Vina Valves is constantly innovating in production management, designing new products, and developing business models.

Vina Valves is a member of Keiejuku-Vietnam Community .

JAPAN QUALITY

With the training support received from the Japanese government through **Panasonic experts** of JICA (Japan International Cooperation Agency), Vina Valves' factory operates based on the *Monozukuri* - Toyota production system with 5S, Kaizen, PDCA, Kanban, and 5W2H pillars.

The most important aspect is that we strive to create the best products to offer to the community and society. Our products are made in Vietnam but meet the high-quality standards of Japan.
