The philosophy of Vina Valves, Tam Tu:
Encompassing the principles of self-governance, self-sufficiency, and self-strengthening.

Van Vina prioritizes the empowerment and development of its people, providing them with a conducive environment to constantly enhance their Self-reliance and Self-respect. This fosters their ability to contribute effectively to the economic development of the country, while also playing a pivotal role in building a Self-governing, Self-reliant, and Self-sustaining Vietnam.

Self-sustaining contributes to Vietnam's Sustainable Development.

Self-reliance of Vietnam's Mechanical Industry

Self-governing empowers Independence and Responsibility.

Products Certificated Standards

Vina Valves has achieved both UL/ULC certifications and FM Approval, conquering the most demanding markets in the industry, which are the United States (USA) and Canada. We are dedicated to ensuring that our products meet the highest standards in the industry, and we strive to continually improve our processes and products to meet and exceed our customers' expectations.

DURABILITY CERTIFICATED BY US 129-YEAR-OLD TESTING CENTER

UL (Underwriters Laboratories) is a global safety consulting and certification company based in the United States that provides testing, inspection, auditing, and certification services for a wide range of products, systems, and processes.

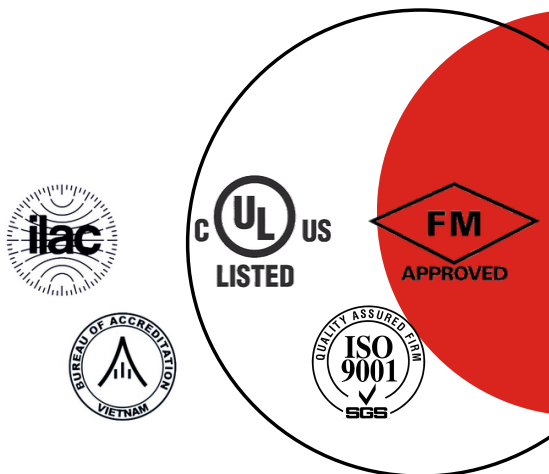

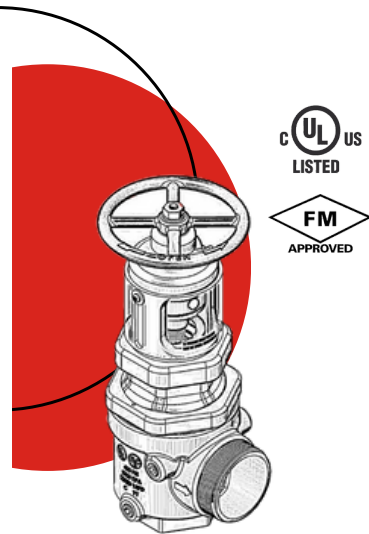

FM Approval is granted to products and services that meet the rigorous standards set by FM Global for property loss prevention, including fire protection, electrical systems, building materials, and industrial equipment.

CORE COMPETENCY

Vina Valves is the first OEM/ODM producer in the world that has successfully produced Brass Field Adjustable Pressure Reducing Straight Line Valve with Hot Forging technology

Research & Development

Certified Quality

Vina Valves has achieved rigorous certifications, conquering the most demanding markets in the industry, which are the United States and Canada.

Monozukuri

Monozukuri Manufacturing techniques has been a cornerstone of Japanese manufacturing and has contributed to the country's reputation for producing high-quality products.

THE SPIRIT OF JAPAN'S MANUFACTURING

Japan is renowned for its spirit of dedication and craftsmanship to producing high-quality, high-precision products. This spirit is deeply rooted in Japanese culture and is reflected in their approach to manufacturing. Japanese companies prioritize attention to detail, continuous improvement, and a commitment to excellence in their products.

This mindset is ingrained in Japanese's management philosophy, where national interests, people ethnicity, and the pursuit of Quality - Cost - Delivery - Safety - Environment are considered key values.

VVN: EMBRACING JAPANESE MANUFACTURING EXCELLENCE

Vina Valves Jsc., influenced by JICA, has adopted Japanese manufacturing system techniques to ensure the quality of its products. The founders of Vina Valves have imbibed the Japanese entrepreneurial spirit and management philosophy. This includes principles such as:

- **QCDSE (Quality - Cost - Delivery - Safety - Environment)**

- **Kaizen, JIT - Just in time**

- **5S, 5W2H, PDCA, Horenso**

which are all part of the Toyota Production System (TPS) - a renowned Japanese manufacturing system.

By incorporating these techniques, Vina Valves strives to create Japanese-quality products, and establish a strong export to Global market, aligning with their vision of building a "Proud Vietnam Valves" brand.

QUALITY CONTROL

We maintain a consistent level of product quality throughout our production process, starting from the selection of input materials to the delivery of the final output.

INNOVATION: From Casting to Hot Forging

INNOVATION. QUALITY. EFFICIENCY

Designing

We offer both **OEM manufacturing** based on customer-provided technical drawings and the flexibility to **redesign** products according to the customer's functional requirements.

Hot Forging

At VVN, our industry-leading hot forging technology allows us to achieve significant **cost reduction** manufacturing while delivering products of **superior quality** compared to traditional casting methods.

Machining

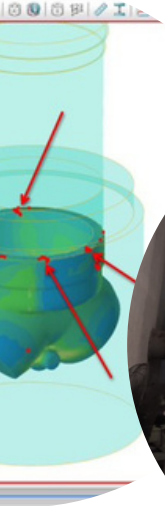

Our universal CNC machines enable us to manufacture **high precision** products up to 6 inches in size that meet our customers' exact specifications.

Assembly

At VVN, our automatic assembly line guarantees that our partners' **Quality and Delivery standard** are meticulously met.

Testing

At VVN, our specialized pressure testing system adheres to UL standards, ensuring that all of our products are qualified and meet **UL requirements 100%**.

TOP-tier Businesses Community

WHAT IS KEIEIJUKU

Keieijuku is a government-sponsored program between Vietnam and Japan, overseen by JICA (Japan International Cooperation Agency), that provides specialized training to selected companies by Panasonic experts in the implementation of a Japanese-style Monozukuri production management system. The Keieijuku Vietnam, boasts over 650 members nationwide with a workforce of over 60,000 employees and an annual revenue exceeding USD 4 billion. The Keieijuku Vietnam community dedicated to serving society and the community through charitable initiatives and promoting business growth and development through regular networking events.

MONOZUKURI TECHNIQUES

QCDSE framework:

Quality - Cost - Delivery -
Safety - Environment

The Monozukuri Management Principles:

- Kaizen (Innovation)
- JIT - Just in time
- 5S, 5W2H pillars
- Visual management
- PDCA, Kanban, Horenso

VVN WITH KEIEIJUKU

As the chairman of Vina Valves JSC, Mr. Nguyen Dao Vinh brings his extensive expertise in the metal manufacturing industry to the Keieijuku community, where he serves as a leader on the executive board and vice president, driving innovation and growth for the community.
